DREWA - HYDROINSTAL

EST. 1962

WWW.DREWA-HYDROINSTAL.PL

LADIES AND GENTLEMENT,

Przedsiębiorstwo Inżynieryjne Dřewa-Hydroinstal Sp. z o. o. is a direct continuation of the activities of its Founder, late Czeřław Dřewa, my Grandfather, who established it in 1962. **For over 60 years, our company has developed a market reputation as a reliable, stable and professional partner in the broadly understood sanitary industry,** both in the implementation and design areas.

Using the state-of-the-art technical solutions, we rely on traditional values instilled in our company by its Founder from the first days of its operation: respect for work, investments in the employees who make up the company, conscientious implementation of concluded contracts and effective and timely execution of works. I am proud that, having climbed the career ladder in Dřewa-Hydroinstal from fitter, through engineer and works manager, to the position of President of the Management Board, I can continue my Grandfather's life's work. I'm making sure that all these values guide us today as they always have.

In business, we focus on long-term relationships with our partners based on mutual trust, professionalism and experience. We execute contracts for the public sector and private entities. We are proud of our cooperation with leading entities on the market.

If you value cooperation with a professional, competitive, experienced, reliable contractor, please contact us!

Yours faithfully,

Przemysław Lademann
President of the
Management Board
General Director

OUR ADVANTAGES

60 YEARS

60 YEARS OF EXPERIENCE

60 years of Dřewa-Hydroinstal's presence on the market means hundreds of completed investments in the form of general contracting and subcontracting in the water and sewage industry. We provide services for local government units and large entrepreneurs. We have carried out industrial works, among others: on key road and railway investments, as well as in port areas. Moreover, we have experience as a water supply network operator.

Experience, reliability and stable business relationships translate into competitiveness, which we can maintain thanks to our high potential and the trust of our partners.

PROFESSIONAL TEAM

A committed, stable team of employees and qualified staff are our hallmarks. We rely on our own human resources potential, combining youth and enthusiasm with experience – some of our retiring employees can boast of 50 years of service! **We constantly train our employees, focusing on safety and efficiency.** We use modern methods and tools to manage the company. Reaching boldly for the latest technological achievements. We care about solid and reliable execution of our works, we are ambitious and we set the bar high.

STATE-OF-THE-ART EQUIPMENT

We have our own, constantly expanded and renewed machinery and extensive equipment resources. These include, among others: several dozen excavators, backhoe loaders and mini excavators, self-dumping trucks of various cubic capacity, WUKO and HDS vehicles, drilling rig for directional drilling, jacking machines, vibration hammer for driving sheet piles, as well as drainage sets with combustion and electric pumps, inspection cameras and an extensive system excavation protection (box formwork, column formwork, etc.). We also have the ability to make technological holes up to $\varnothing 1000$. Our equipment potential ensures the highest quality and efficiency of work performed, while maintaining competitive prices. We are not afraid of carrying out the most difficult tasks.

We specialize in the construction of water supply networks, sanitary and storm sewage systems, along with the accompanying infrastructure.
